

Robyn Kingston

Full Stack Developer

✉ kingston0604@outlook.com ☎ 07769578549 📍 Livingston, UK

A dedicated web developer with **6 years** of experience, specializing in **MERN** stack. Proven track record of helping to build technology-based businesses from the ground up while working at leading technology companies. Demonstrated history of successful team collaboration and an aptitude for quickly mastering new technologies, cultures, and roles.

Professional Experience

04/2023 – 05/2024
Bedford,
United Kingdom

Full Stack Developer, Vertiv

- Designed and developed two decentralized applications using **React**, **Flow/Cadence**, and **Polygon/Solidity**.
- Integrated smart contracts with the frontend application using **web3.js** and **Ethers.js**.

09/2022 – 02/2023
Nottingham,
United Kingdom

Full Stack Developer, Vision Express

- Developed a custom **e-commerce** platform using **React** and **Node.js**.
- Collaborated with 2 designers to implement the **UI** for complex and visually impressive features.
- Integrated several third-party payment APIs, including **PayPal** and **Moonpay**, into the e-commerce application.
- Created testable React components using **Jest** and the React Testing Library.

07/2019 – 08/2022
Portsmouth,
United Kingdom

Full Stack Developer, Carrington West

- Utilized React and Node.js in conjunction with Bootstrap, resulting in a 50% increase in customer conversion.
- Reduced project development times by over 60 hours through the creation of reusable components and templates.
- Introduced a Test-Driven Development (TDD) methodology and proposed the use of Scrum, which shortened release times by 40% and improved code quality.
- Designed and developed a scalable, production-ready RESTful API.
- Gained experience working remotely with a small team of engineers and project managers.
